Mint of the United States at Philadelphia,
MELTING AND REFINING DEPARTMENT,

Philadelphia, 21. October, 1884.

Sir,

I have read the letter of the Director of the Mint, drawing attention to the diminished percentage of Gold coin produced during the last fiscal year compared with the amount operated on. As this calculation does not fall within my province, I know nothing of the figures presented. I will however call your attention to the inferior quality of some of the Copper, purchased for alloying gold and silver, during that fiscal year, in consequence of the obligation to purchase that which is offered at the lowest price. Much of such copper entered into our gold, and so injured it, that much was returned on my hands by the Coiner, so that it was reported as delivered twice to me, while it was actually only delivered once
